ADJ Pocket Pro

ADJ's Pocket Pro offers users the same features as the company's Pocket Spot but adds replaceable gobos, four additional gobos, a powerCON input and brighter output — without an increase in retail price. Powered by a 25W white-light LED (increased from 12W on the Inno Pocket Spot), the Pocket Pro produces a vibrant beam with a 15° beam angle and is fitted with a manually-adjustable lens that can be used to alter the focus of the beam to suit different projection distances. The fixture also includes a seven-color-plus-open color wheel.

Chauvet Maverick MK2 Profile

Chauvet Professional's Maverick MK2 Profile, the first profile light in the Maverick series, is a 440W LED moving yoke fixture with an illuminance of up to 14,981 lux at 5 meters and a zoom angle of 14° to 36°. Featuring a four-blade framing shutter system with rotation and dual axis movement for each shutter, the Maverick MK2 Profile lets users shape and size beams with great precision. The fixture's iris, 3-facet motorized rotating prism and motorized frost provide added beam control. It's suited for a variety of theatrical, house of worship, touring and event applications.

Leprecon XC 350 with Monitor

Leprecon's XC 350 lighting console is designed to provide a variety of playback options for events ranging from improvised performance to tightly scripted shows. Large edge wheel encoders and direct access Color, Beam, and Position label keys simplify programming LED and automated fixtures. The LPC software base provides an easy-to-use interface, and new XC features make this an ideal console to control intelligent, LED and conventional fixtures.

Mega-Lite Piccolo Blinder

The new Mega-Lite Piccolo Blinder is a compact, bright, IP65-rated blinder that can be used indoors and out. Equipped with one COB LED, the Piccolo Blinder is designed to produce a powerful punch while only using a 120W of power consumption. It is supplied with in-and-out signal and power cables, which allow for multiple fixtures to be connected in series. With a beam angle of 60° and a color temperature of 3000K, this compact blinder can illuminate large areas, such as stages, theaters, churches and more.

RP64 – Par64 LED Replacement Lamp

Now available: a drop-in LED replacement for PAR64 incandescent light bulbs. OnSiteLED presents the RP64: an ETL-listed, energy-efficient, LED lamp for PAR64 fixtures, compatible with existing dimmer systems and wiring. Upgrade your PAR64 fixture to LED with a simple re-lamp.

The RP64 uses 1/10th the power of 1000 watt bulbs with significantly less heat. Tool-less optics change beam angles on the fly, without changing lamps.

- 2000K to 6500K CCT up to 97 CRI
- Metal enclosure, 8-inch mount for Par64 fixtures
- Designed and made in the USA
- Six quick change reflectors for light pattern options. No tools required!
- "Super Silence" fan, under 11dB
- True drop in bulb replacement, 'plug and play' into mogul plug socket fixtures

Luxium Lighting Ziba

Luxium Lighting's Ziba is a compact, battery-powered, long-life and wire-free luminaire for event producers. Equipped with a Luxium six-channel LED engine, Ziba offers full-color adjustment and selectable white CCT settings with the best efficacy available. This 3.5-pound event light's 12 RGBLW LEDs can run at the full brightness (over 1,500 lumens) for more than 11 hours. Convenient wireless operation from Luxium's Bluetooth mobile app or the new ShowCast wireless DMX system is included, along with weather-resistant construction for outdoor use and color-wrap options for a customized look.

Whirlwind Catdusa

Whirlwind's new Catdusa serves as a convenient way to use Cat5 or Cat6 Ethernet cable for transmitting analog audio, AES/EBU digital audio or DMX lighting control. Catdusa is a four-channel analog snake box that uses shielded Cat5 cable instead of traditional multipair cable. Each channel has paralleled male and female XLRs, allowing for greater flexibility. The two Neutrik etherCON RJ45s (In/Thru), lets users daisy-chain multiple boxes. If shielded Cat5 cable is used, Catdusa can pass phantom power and DMX. The Mini stage box design means Catdusa can be placed anywhere. There's also a rackmount accessory that houses two Catdusas.
