ADJ Entour Faze

ADJ's 450W Entour Faze machine creates a thin mist of atmospheric in the air, without a large plume of smoke, to enhance light beams. It produces haze 40 seconds from the time it's turned on, and it can be operated by the faze trigger switch on the rear of the machine, the supplied Entour VT-1 wired remote or from a DMX controller. It has a 3-liter tank that uses standard water-based fog fluid. ADJ recommends F4L ECO water-based fog fluid as an ideal match for this fazer.

Chauvet Professional Maverick Storm 1 Wash

Chauvet Professional's Maverick Storm 1 Wash is the first IP65-rated fixture in the company's Maverick series. Along with an aluminum housing and stainless steel external screws, the fixture offers 6,000+ lumens of output from 19 individually pixel-mappable 20W LEDS, a virtual gobo wheel with background colors, a wide zoom range and 16-bit dimming. The Maverick Storm 1 Wash also offers a range of control protocol options, including DMX, RDM, sACN, Art-Net, Kling-Net and W-DMX. LDI visitors can check this new fixture out at booth 1816.

Chroma-Q Vista 3

Shortly after Chroma-Q acquired Jands Vista and rebranded it as Vista by Chroma-Q, the new owners launched Vista 3 software. It lets users merge multiple showfiles, provides a new color engine that supports up to 11 colors, improves 2D fixture visualizations and offers customizable workspaces, an expanded command line interface and Smart FX masters. There are also two new Vista by Chroma-Q control surfaces, the Vista MV and Vista EX. The Chroma-Q website has a Vista 3 demo video and free downloadable demo version of Vista 3.

Elation TwinkLED Lens Design

Elation's new TwinkLED, unveiled at PLASA last month, is a new patent-pending LED lens design. TwinkLED promises designers additional layers of creativity with new looks made possible with dedicated high-brightness pixels inside large front lenses. The first fixture to feature TwinkLED is Elation's Proteus Rayzor 760, pictured here. Other featured fixtures at PLASA included the Smarty Hybrid and Artiste Van Gogh. Elation will also be featuring its full range of new fixtures at LDI this month, at booth 931, along with ONYX and Obsidian control systems.

Mega-Lite Circa Scoop LED

The Mega-Lite Circa Scoop LED's lightweight housing is designed to add a retro twist to the lighting looks for concerts, churches, theaters or clubs. The 45 WW and amber LEDs in the center can be used for warm sunset effects. The reflective pattern ring has an additional 87 WW LEDs, and an inner ring has 144 RGB LEDs with eight-segment control for additional looks. The outer ring also features eight segments and is equipped with an extra 192 RGB LEDs that illuminate a 140-degree angle. The 336 RGB LEDs can produce multiple color combinations and dazzling eye-candy effects.

Shenzhen INFiLED Electronics Co., Ltd.

Air Carbon Solutions AC5.35

INFiLED AC5.35 delivers an innovative solution for rental and staging applications. One of the main outstanding features is bigger panel (600 x 1350mm) with super lightweight (14.5kg). Bigger and faster, over 60% higher setup and dismantle efficiency than other ordinary rental panels.

The AC5.35 panel ratio is 4:9 which makes it very easy to build different screen ratios. With high refresh rates, high greyscale levels, high contrast and black LEDs in common cathode driving technology, AC could deliver perfect display performance. What's more, LED modules and PDU use a combination of magnets and captive screws to achieve easy and quick maintenance of the screens.

For faster screen building, touring frame and set cart could be optional. As AC frame and TC both are made of carbon fiber, the whole products are lightweight. Each AC/TC is 27kg only while half panel is available as well. For creative stage building, AC and AC/TC could also form convex and concave angle range from +5° to -5°.

Present Excellence

SPECIFICATIONS

Pixel Pitch: 5.35mm
LED Arrangement: 3 IN 1 SMD
Module Resolution: 56 x 63pixels
Module Dimension: 300 x 337.5mm (11.81 x 13.29 in)
Cabinet Resolution: 112 x 252pixels
Cabinet Dimension: 600 x 1350 x 93mm (23.62 x 53.15 x 3.66in)
Cabinet Weight: 14.5kg (31.9lb)
Brightness Level: ≥5000nits
Max Power Consumption: 600w/panel
Ave Power Consumption: 200w/panel
Refresh Rate: 3,840Hz (configurable)
Ingress Protection Rating: IP65
Max Rigging: 20.25m (66.44ft) or 15 panels
Certifications: CE, UL, TUV

Claypaky Axcor Profile 600 & 400

Claypaky is bringing the beam-framing strengths of its Axcor Profile 900 to more users with the Axcor Profile 600 and 400. The 600 zooms from 5° to 45° (1:9 ratio) and has a "boost mode," making it suited to the needs of tours and large events. The compact and quiet 400, for medium-high power needs, has a framing system that works on four focal planes, an effects section with an animation wheel, plus a complete color system with linear CTO and a high precision mechanical iris.

High End Systems SolaFrame 3000

The SolaFrame 3000 combines powerful light output from its 1000W Ultra-Brite White LED engine with a wide range of effects and color possibilities. With a 37,000+ lumen output, the SolaFrame 3000 measures up to powerful arc lamp fixtures. The fixture is also available in a High-Fidelity version with highly accurate color rendering. Features include a CMY/CTO linear color mixing system, seven position replaceable color wheel, framing system for beam shaping, interchangeable and rotating gobo wheels (7+ open), continuously variable animation wheel and more.

Whirlwind PLR-PS2 Rackmount Outlet Strip

Whirlwind expands its Power Link line with the PLR-PS2 Rackmount Outlet Strip with LED strip lighting. The 4-color (RGBW) LED strip light includes a shield over the top and front and illuminates the face of the power distribution rack. You can choose any of the colors, mix the colors to create your own, and can dim the strip lights. The single-rackspace unit comes with a front panel, internally lit switch that turns rear panel's eight 15A Edison outlets on and off; a front convenience outlet and circuit breaker.
