

Road Cases

By NookSchoenfeld

With the price of gear what it is these days, the one thing every production house, vendor, band member or traveling event needs is protection. Whether you are protecting that piece of gear from the rigors of the road or the elements of nature, it's only wise that each piece travel in as close to new condition as possible and work every day. Road cases are designed for just that. We have found a collection of case manufacturers devoted to protecting your products. From simple ATA cable trunks to roto molded inserts for plasma screens, you will find it all here.
